

Camosun Community Association

Dear Neighbour,

The Camosun Community Association is seeking input on an antenna proposal in our community. TELUS and WIND Mobile have applied to install a new antenna on the Fisher Building at Camosun College's Lansdowne Campus. The guyed structure on the roof of the building will be extended to 24.4m in height, and will accommodate wireless telecommunications antennas and accessory equipment. For more information, a detailed information package will be posted on the CCA's website at www.CamosunCommunityAssociation.com. Please refer to this information before completing this form. The Camosun Community Association will be making recommendations to Saanich based on the feedback received from area residents. We hope you will take a moment to complete the following so that we can best represent your views.

If you have any questions, please contact Caleb Horn of the Camosun Community Association at horn.calebj@gmail.com or by phone at 250 595 8924.

Once completed, you can arrange to have this form picked up or you can drop it off in the collection box at **1916 Argyle Street**.

Name(s): _____

Address: _____

Please circle your position on the proposed antenna extension proposal at Camosun

College's Lansdowne Campus:
